

Steeped in historical drama and the long-forgotten tradition of family history, this collection of three small books, written by members of the Reynolds-Matthews ranching families of early West Texas, were originally written decades ago in the form of privately printed pamphlets that were illustrated with old family photographs. *Reminiscences* tells of a childhood on the frontier, of ranching before fences, and of the simple joys of nature and family. *Summers at Lambshead* by John Burns provides a candid look at the outsized personality of the authors grandfather, John Alexander Matthews. *Uncle Bennies Limb* is at the same time an American genealogy dating back to several generations before the founding of the Jamestown colony, a delightful memoir of three generations of West Texans, and an indelible portrait of a small-town American childhood in the early twentieth century.
