

I wrote this book quite some years ago and it was my first book ever written, however I was reluctant to get it published for a whole list of reasons. I converted to Islam a while back and set sail for Morocco Tangier and when I got there I was shocked. If I went to Morocco as a Christian I never would have converted to Islam due to the horrible behavior of the Moroccan people. I am not saying that they are all bad because that is not true, However most of them are just Muslims by name and not by faith. This book Im sure will upset a lot of people and there are some parts of it that I am not sure if I should have kept them in or taken them out. There is so much more that could be said on the subject matter but as always, I like to keep my books short and digestible. The book is mainly attended for Muslim readers but non Muslims can be an audience as well. The book is also based on some concepts of philosophy as well as understanding the Arabic mind, which at the present seems Medieval. The bulk of this book is discussing the migration of Muslims from Asia and the Middle east not to mention Europe such as Bosnia to the western countries. In our study we will be observing the statistics of number of Muslims living in Europe and war crimes that were conducted against Muslims, forcing them to migrate. We will also be discussing the origins of pure monotheism and how one can get back into the fold of Islam.
